ZL 1500X PEEK

ZL is pleased to announce the addition of our new ZL 1500X PEEK to join our ZL 1500 high performance PEEK line! ZL 1500X offers superior properties to standard PEEK. ZL 1500X provides higher purity, higher service temperature resistance and superior impact resistance than most high temperature engineering thermoplastics

available today. ZL 1500X's unique property profile will give you the opportunity to establish your company as the source for the latest technology for critical OEM applications in your area. ZL 1500X is available in rod & plate; contact your ZL representative for current size availability, a tech data sheet or to discuss your specific application!

Good Application:

ZL 1500X PEEK used as a seal in the oil industry.

Bad Application:

Carving a seal out of ZL 1500X PEEK.

Featured Highlights:

- Lower ionic impurities.
- Good strength at high temperatures
- High impact resistance.
- Quality that exceeds ZL's already high standards.
- ZL 1500X is available in sheet and rod.

Leads, Leads, Leads!!!

ZL's Lead Generation Assistance program is in place to assist you and your sales team to develop new sales in your respective markets. Through our

program our sales team will call potential end users, qualify them by identifying materials being used, applications and current sources. We

are also available to assist you by partnering with your team to make joint sales calls to target the ZL provided leads, or call jointly on your prospects!

Contact your local ZL representative for details!
