

A yellow sun with a smiling face and black sunglasses.

DOG DAYS OF SUMMER

ZL Quarterly-July 2009

Summer is finally here! The team here at **ZL** is always excited to enjoy various outdoor activities in the summer time. A favorite of ours is spending time with our pets'. Speaking of *PETs*', are you aware that **ZL** stocks an impressive inventory of *PET* rod and sheet in natural and black? Combined with our exceptional pricing and superior quality, PET has always been a strong point of **ZL**'s already impressive product line. PET displays good hardness, strength and superb sliding properties as well as excellent wear and abrasion resistance in wet or dry environments. The unique combination of properties also makes it the choice material for high precision and moving parts and is USDA/FDA compliant.

Not only is our staff knowledgeable of mechanical applications, so are our pets. See for yourself!
